NSA Declassification/Release  
instructions on File.

Telephone Conference -

1. On 17 February 1960 [redacted], OC-S, called the  
writer to inform him of the following:

25X1A9A

A. He recently talked to [redacted] NSA, regarding  
the recent discussions to modify the [redacted] equipment.  
This equipment is the engineering model first developed  
by the [redacted]. It did not perform as  
well as expected. [redacted] has examined this equipment  
and recommended several modifications to be undertaken  
before continuing with the contract. These modifi-  
fications have since been turned over to [redacted]  
Corporation for their evaluation.

B. A meeting is to be arranged between representatives of  
this Agency and NSA sometime within the next two or  
three weeks to clarify and explain the modifications  
to be incorporated into future [redacted] equipment.  
This meeting will be held at Fort Meade. No firm date  
has yet been set, however, the writer will be kept  
informed by [redacted]

25X1

C. The contract for developing the typewriter portion of  
[redacted] will be extended from 5 March to 5 June 1960.  
This is brought about by the fact that the contract was  
held up for final determination of what modifications  
are to be incorporated into the equipment. Delivery  
of the HL-4 hand-held unit is expected in mid-March.
